

Are we vaccinating immunocompetent or immunocompromised people for COVID 19?

Huang Wei Ling

Medical Acupuncture and Pain Management Clinic, Brazil

Abstract

Introduction: Since January 2020, Chinese scientists shared the SARS-CoV-2 genomic sequence and approximately, 321 research groups begin the search for vaccine since then. The CDC notes that immunocompromised patients may receive the vaccines so long as they have no contraindications to vaccination, but that they should be counseled about the unknown safety profiles of the vaccines in immunocompromised populations.

Purpose; the purpose of this study is to demonstrate that the majority of the patients that the author is attending nowadays is in the category of immune compromised patients.

Methods; the author did radiesthesia procedure to measure the energy of the seven chakra of 1000 patients during 2015 to 2020. Doing this measurement, the author was measuring the energy of the five massive organs in traditional Chinese medicine, responsible for the production of energy Yin, Yang, Qi and Blood, important to maintenance of health in the human body and the production of Zheng-Qi, that is responsible for the protection of the body against the invasion of external pathogenic factor, in this case SARS-CoV-2.

Results; the result of this study is that more than 90 percent of the patients analyzed were in the lowest level of energy, meaning that their immune system are compromised because energy in TCM means immune system.

Conclusion: to vaccinate people from COVID 19 nowadays, it is important to analyze the energy of each person before doing the vaccination because, according to the research made by the author, more than 90 percent of her population were in the lowest level of energy, meaning that they all have immune system very compromised.

Biography

Huang Wei Ling, born in Taiwan, raised and graduated in medicine in Brazil, specialist in infectious and parasitic diseases, a General Practitioner and Parenteral and Enteral Medical Nutrition Therapist. Once in charge of the Hospital Infection Control Service of the City of Franca's General Hospital, she was responsible for the control of all prescribed antimicrobial medication and received an award for the best paper presented at the Brazilian Hospital Infection Control Congress in 1998. Since 1997, she works with the approach and treatment of all chronic diseases in a holistic way, with treatment guided through the teachings of Traditional Chinese Medicine and Hippocrates. Researcher in the University of São Paulo, in the Ophthalmology department from 2012 to 2013.
