

## Art and science between digital and manual smile makeover

Ahmed Saad

AL-Mustansirya University, Iraq

### Abstract:

Nowadays, most of the peoples seeking for white teeth but why?? Because the white teeth mean healthy teeth, the patient appears younger and also increases the confidence of the person. Smile Makeover between art and science (indirect restorations from A to Z in full steps and details) for difficult and challenging cases in our daily work dentistry. So its important to differentiate between fake white and naturel white teeth to offer the best results to our patient and to draw the correct treatment plan to patient and also its necessary to know the patient demand that play major factor in our treatment. We will discus the patient need and how to diagnose and treat the case by digital approach, DSD and motivational mock-up before touching the natural teeth, criteria of minimal invasive preparation of the teeth, most accurate impression techniques and finally the cementation protocol of fixed prosthesis either crowns or veneers.
