

Dermatological disorders and oral cavity

Guru Raja Rao

Hanumanthanagar Dental Clinic, India

Abstract:

Our mouth has over 300 disorders which could be seen as a result of various changes due nutrition, metabolic, endocrinal, stress, developmental, microbial infections. Dermatological condition also influences oral cavity. Several infections have preponderance to manifest in the oral cavity before it afflicts other areas in the body. An attempt has been made to discuss some of such dermatological conditions which are of interest to dental surgeons.
