

## Ending the Pain Crisis with TCM, Peptides and Brain Regeneration

Regan Archibald

*Traditional Chinese Medical College of Hawaii, USA*

### Abstract:

1.5 billion People worldwide experience life with chronic pain. The conventional use of opiates to treat pain has proven to be unsuccessful. The emergence of using peptides with TCM has proven to be successful when used in combination with Regenerative Medicine. Acupuncturists can easily implement new medical breakthroughs into their practices without departing from the core philosophies of TCM. Removing inflammatory patterns in the brain is proving to be an effective way to resolve pain without origins with stem cell therapy, peptides and nootropics. These can be used in conjunction with acupuncture for lasting results.

1. How to Identify what pain is contextually and why it's presenting.
2. How to expand Patient Results and Progress by enhancing BDNF and NGF.
3. How to Use GHK-Cu and BPC-157 with acupuncture for pain relief.
4. How Stem Cell Therapy, Nutrition, Ozone and Acupuncture can all be used together for neuropathic pain.
5. Learn the key peptides for calming brain inflammation and improving

### Biography:

Regan Archibald, LAc, FMP, CSSAc, graduated with his

Masters of Science from the Traditional Chinese Medical College of Hawaii and went on to create the award-winning clinic, East West Health in 2004. East West Health has 4 locations throughout Utah and is one of the few clinics in the nation to successfully integrate traditional eastern medicine, stem cell therapy, peptides and functional medicine. Regan is also the founder of Go Wellness which is a training and educational program for some of the most transformative Doctors in the healthcare field. He loves mentoring, and coaching and working with individuals who are seeking natural solutions for pain..
