Euro Pediatrics 2020

Stefano Nobile

Fondazione Policlinico Gemelli IRCCS, Italy; E-mail: stefano.nobile@policlinicogemelli.it

After much anticipation from our previous participants, we are organizing the “**European Pediatrics Congress**” on **July 30-31, 2020** to take place in **Rome, Italy**.

The Euro Pediatrics 2020 contributes the opportunities to determine advance techniques, research, and developments in the healthcare field of Paediatrics. All over the world these new methods and advanced techniques will be used to ensure the health of paediatrics and children.

This Academic event includes imperative Keynote forums, plenary presentations, poster presentations, workshops, exhibitions and more. By participating in forums, sharing research and collaborating, the research community will be much benefited.

Organized with the motive of accentuating the research with the help of international Pediatricians, neonatologists, surgeons and researchers by bringing together all the related experts and professionals under a single summit to emphasize the developments in health care and the future holds of Surgery.

Pediatrics is the branch of medicine dealing with the care of infants, children and adolescents and the prevention and treatment of their diseases. Although most thinking and analysis of health care is taken from the adult health care system, issues surrounding pediatrics are unique and challenging and should be treated differently than adults.

A major challenge the pediatric healthcare community faces is in relation to Medicaid funding. While the cost of health care for most children is relatively low, those who require hospitalization or specialty care experience a tremendous increase in total cost. Additionally, with a focus on preventative medicine, more resources need to be allocated to pediatrics. Medicaid funding for children estimates about 20 percent of total funds, yet children make up about 60 percent of enrollees. Typically, nursing homes and geriatrics utilize the most Medicaid dollars but for a much smaller population. While healthcare reform is an ongoing issue, the unique needs of children need to be included.

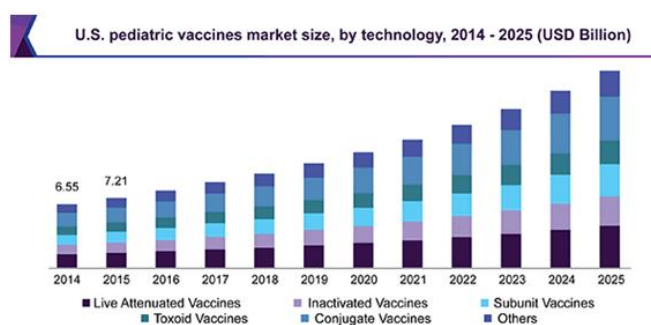

We are contended to various delegate experts, company representatives and other eminent personalities who supported the conference by facilitating active discussion forums. As per the requests from our previous participants we are glad to introduce the European Pediatrics Congress.

Bringing the series back with Euro Pediatrics 2020!

Global Pediatricians Industry 2019 research report signifies the detail overview of current market State, Size, Share and forecast 2019-2024. The Pediatricians report further covers the complete analysis of the future progress of the Pediatricians Market. Additionally, this report gives Pediatricians Market trends, share, growth, and cost structure and drivers analysis.

“**Pediatricians Market**” 2019-2024 report analyzes important features in key developing markets. The analysis contains market size, newest trends, drivers, threats, opportunities, as well as key market segments. The study reveals market dynamics in numerous geographic segments along with Pediatricians market analysis for the current market environment and future development over the forecast period.

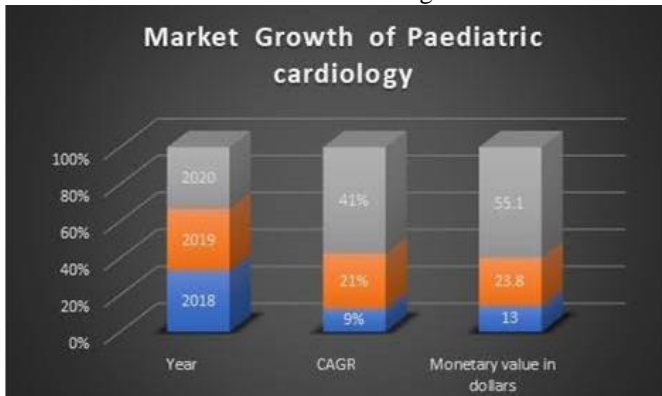

Europe held the second spot in the global pediatric healthcare market in 2018, due to the increasing demand for chronic disease treatment, rising healthcare infrastructure, and growing enterprises of medical hospitals and clinics. Germany, the UK, and France are major countries in the European pediatric healthcare market. The UK is estimated to be growing rapidly over the forecast timeframe. Germany dominated the European market with a major revenue share in 2018, due to the increasing adoption of advanced medical treatment and various technological advancements.

The Asia Pacific pediatric healthcare market will show the highest CAGR over the forecast time period, owing to the various

improvement in the healthcare infrastructure, rising demand for chronic disease treatment, technological developments in medical devices, and the increasing children population suffering from diseases and disorders. China and Japan are dominant country-level markets in the region, whereas India is estimated to grow rapidly in the upcoming years.

The Latin American pediatrics healthcare market is expected to grow moderately in the future, owing to the growing number of disease treatment for chronic diseases and technological developments in medical devices. Brazil is expected to contribute the largest revenue share to this regional market. The Middle Eastern and African pediatrics healthcare market will register slow growth in the years ahead, owing to the underdeveloped healthcare infrastructure and lack of advanced medical technologies for treatment.

The global pediatric healthcare market is likely to grow notably, due to the exponential increase in the demand for chronic disease treatment, changes witnessed in childcare trends, increase in the obese population base due to sedentary lifestyle, rise in the number of hospitals and clinics, improvements in healthcare infrastructure in developing economies, high acceptance rate of pediatric healthcare, escalation in starvation among pediatric population, advancements in medical technology, and supportive government initiatives.
