Abstract

According to Western medicine headache is not a symptom but a disease in its own right. There are four types of primary headache: migraine, tension headache, trigeminal autonomic cephalalgia, and other primary headache disorders. In traditional Chinese medicine (TCM) theory classifies migraine as an external invasion or an internal disruption. Depending on the area where the headache is occurring, the doctor will be able to identify which energy meridian is affected. Frontal headache means involvement of the Stomach meridian. Temporal headache (Gallbladder); parietal (Liver); occiput (Bladder). Weight pain means moisture retention. Purpose: The aim of this study is to demonstrate that there is a correlation between eating certain types of food and headache. Methods: Through an extensive literature review by PubMed and NCBI on headache in Western medicine and traditional Chinese medicine and the report of a clinical case demonstrating the importance of dietary counseling in the adequately treatment of headache symptoms. Foods that imbalance the Liver and Gallbladder are: fried foods, chocolate, honey, alcoholic beverages, coconut, eggs. foods that imbalance the bladder are: coffee, soda and matte tea. And foods that impair the balance of spleen and pancreas meridian could cause the sensation of weight pain are; dairy products, cold water, sweets, raw food..

Biography:

Huang Wei Ling, born in Taiwan, raised and graduated in medicine in Brazil, specialist in infectious and parasitic diseases, a General Practitioner and Parenteral and Enteral Medical Nutrition Therapist.
