### EDITORIAL

I am happy to announce that the Neurology and Neurorehabilitation (NNR) is a new journal and that gave me opportunity to bring forward the achievements of the journal in the year 2019. As we know that NNR is the newly coined journal, it is under development and growing fast to be indexed by various indexing agencies. The entire issue was published by NNR at the time and the preprints were also released and dispatched online within 30 days after the article was published online. NNR welcomes all types of publications, including Research papers, case studies, review papers, brief commentaries, mini analysis etc.

NNR is an open access journal of which main aim to publish the most relevant and complete source of information about the current developments and discoveries in the field of Neurology and Neurorehabilitation. Neurological disorders are particularly epilepsy, and dementia is highly prevalent throughout the world. This condition interdisciplinary involves a deeper understanding of neurology and neural pathways. There is a rapid growth and expansion in the neuroscience investigations over the last decade. Neurology and Neurorehabilitation journal covers all the major structural and functional aspects of neurons and neural network systems.

Specific topics may include epilepsy, headache, Parkinson disease, dementia, infections, cancer, and dystonia, stroke encompassing sub-specialization such as neuropathology, electrophysiology and neuroradiology.

any article with in a given period of time. As the total time period for the online publication of any article is 45 days from the date of receiving. The time of 4 to 5 weeks is taken for different processes such as quality check, peer review, processing of article. Quality checks and peer review processes complete within 14 days and the time period for the publication is only 7 days after acceptance of the article by reviewers and editors. They provide all the authority to the editor to make the final decision about the article assigned to them. NNR has received 2 research articles and 1 mini review papers from authors but they did not fulfil journal criteria so they got rejected in the preliminary quality check process. NNR released 1 issue under volume 1 in that awards and international conferences published.

NNR is going to accomplish International conference in 2020 throughout the world. Journal uses online broadcasting and various social media channels such as Twitter, Linked In, and Facebook for recent updates on what's going on in the newspaper to make people aware of the neurology-related topical issues.

I would like to accept the existence of the contribution of all editors, reviewers, and the other supporting peoples during the final editing of the published articles and the help provided by the editorial assistant in bringing out NNR issues in time. I am very grateful to them for giving me this opportunity to appreciate the work and other peoples form making this journal successful.

NNR is a quality journal which is highly devoted towards time management and completes all the work regarding publication of
