### Abstract

We live in the dawn of the fourth industrial revolution or IR 4.0. with the exponential development of the information technology, the concept of smart health has gradually come to the fore. Smart health uses new generation of the IR 4.0's emerging technologies such as the Internet of Things (IoT), Big Data, Artificial Intelligence, etc. to transform the traditional healthcare system in an all-round way, making healthcare more efficient, more convenient, and more personalized. In his talk, Dr. Oualid Ali, futurist and technologist, will present the concept of smart health by discussing the main key technologies used to support smart healthcare. Also, he will discuss the current status of smart healthcare using several study cases.

### Biography

Dr. Oualid Ali is considered as one of the international well-recognized experts in the fields of Future foresight, Scenarios planning, Trends watching, Emerging technologies & innovations, Industrial Revolution 4.0, Future cities (Smart, Sustainable and innovative Cities), Education 4.0, Artificial Intelligence (AI), etc. He has participated in several projects related to these fields as a speaker, expert, researcher, advisor, or trainer.
