

The Efficacy of the Amomum biflorum Jack cream for preventing dry skin in working age adults

Mohammad Fokrul Islam
Proprietor Of Patowary Corporation

Abstract:

What is Health Informatics?

Health informatics connects people, technology, and data to better improve healthcare outcomes and safety by supporting operational innovation and technological advancements globally. Health informatics is the discipline at the intersection of healthcare, information science and computer science. It is one of the most rapidly expanding field in the healthcare worldwide. In Bangladesh, it is also getting the attention slowly. There are some institutions coming forward with the aim to build professional expertise in the country. Bangladesh University of Health Science (BUHS) is pioneer among them. The discipline has demand in the government, NGO and development organizations. The increasing demand within healthcare both locally and internationally is getting traction with the growing need of the huge population in the countries like Bangladesh. Health informatics integrates data with patient care using cutting edge technology and thus improves the healthcare delivery and access to care; health education and biomedical research; disease prevention; diagnosis; monitoring treatment and outcome; coordination between organisations and healthcare professionals.

BUHS has introduced a masters programme which aims at developing professionals to meet the growing demand in country and abroad. The minimum requirement is an undergraduate degree in medical, dental, nursing, pharmacology or allied health sciences, computer and information sciences or its equivalents from any recognized university.

A country like Bangladesh, where we often lack systematic research data in many fields of healthcare, the demand of health informatics is enormous to build the digital platform for measuring and analysing the epidemiological variables and indicators. The discipline has career

prospect in the government and military setup, NGOs, UN organisations, healthcare delivery institutes, medical device and technology companies, medical software companies, healthcare consulting firms, insurance companies, public health organisations and academia.

Biography:

Mohammad Fokrul Islam is Business man & Village Doctor , He is Proprietor of Patowary Corporation , Patowary Health Care Center , He has Bachelor Degree in National University in Bangladesh, R.M.P (Rural Medical Practitioner) Dhaka , Kamrangirchar 31 Bed Hospital Kamrangirchar.
