

Treating Patients with Chakras Energy Deficiencies and Coronavirus Infection

Huang Wei Ling

Medical Acupuncture and Pain Management, Brazil

Abstract:

Introduction: Coronavirus is a virus that emerged in Wuhan China (December-2019). On September 29th 2020, there was 33.249.563 confirmed cases and 1.000.040 deaths. In traditional Chinese medicine, coronavirus infection is classified as external pathogenic factor invasion. According to a previous study of the author, more than 90% of the 409 patients analyzed have chakras energy deficiency.

Purpose: The purpose of this study is to demonstrate that the energy of the chakras is important to maintain the functioning of the organs, circulation of the energy on the five massive organs. Demonstrate how the lack of this energy could be leading to the complications associated with coronavirus infection, and not by the viral infection in itself.

Methods: A clinical case report of a 42-year-old male patient, layer and work on the military. He was diagnosed with chakras energy deficiencies in November of 2019, and was performing treatment for replenishment of the chakras energy. In May 2020, the patient returned, reported to have symptoms of redness on the face and neck, when he went to bathroom to check on the redness, he fainted for the period of five minutes. He was taken to the emergency, exams were performed and nothing was found. The patient was oriented to increase the water intake to improve the energy of the Kidney, and treatment was started with homeopathy medications, to replenish the energy of the chakras, according to the theory of the author entitled Constitutional Homeopathy of the Five Elements based on Traditional Chinese Medicine, on concentration of 1000CH, as he had taken 30CH and 200CH of the homeopathy (Natrium Muriaticum, Phosphorus, Sulphur, Calcarea Carbonica, Silicia). Medication for taking out Heat retention were also recommended, according to traditional Chinese medicine (Mercurio

solubilis 200CH and Aconitum 6CH) as well as Chinese dietary counseling. After, it was found that the patient had been in contact with three other people who have coronavirus infection and died from the complications.

Results: The patient presented great improvement of all symptoms, on the following day of the start of the medication, not needing hospitalization.

Biography

Huang Wei Ling, born in Taiwan, raised and graduated in medicine in Brazil, specialist in infectious and parasitic diseases, General Practitioner and Parenteral and Enteral Medical Nutrition Therapist.
