

Webinar on Green Engineering

We are overwhelmed to announce the commencement of Webinar. Webinar on Green Engineering scheduled during October 09, 2020 at Dubai, UAE with the theme “Chemistry in Engineering, Solutions to Daily Problems”

Scientific sessions of Green Engineering2020 includes Current Reduce derivatives, Design for safer chemicals, solvents and auxiliaries, Role of catalysis in sustainable chemistry

The conference was initiated with the Honourable presence of the Keynote forum. The list includes:

Speaker Name:

- Takashiro Akitsu, Japan
- Mustafa Ozel, England

The meeting reflected various sessions, in which discussions were held on the following major scientific tracks:

- Less hazardous
- The foundation of sustainable chemistry
- Chemical synthesis and disposal of chemical wastes
- Chemical toxicology
- Design of energy efficiency in chemical processes
- Combating environmental pollution
- Atom economy
- Design for energy efficiency

With the grand success of Past Conference Report on Webinar on Green engineering; during October 09, 2020 in Dubai, UAE
