## Thinking, proceeding and transmission: Suggestions for research program

**Fagogenis Gerasimos**

Athens University School of Medicine, Greece

Over preliminary avocation to (virtual) experimentation upon the feasibility of regional or overall transmission of human brain's electromagnetic waves work as an EEG signal configuration to another Person's cerebral cortex, but remotely like a modulated signal of compatible frequency magnitude, without implement mediation e.g. microchip, cerebral implants or skull electrodes in open air and on any GPS parameter. Emission interaction from brain-to-brain (B-B Interface) means radio antennas sensors and satellite mediated procedures. Primary schedule runs as: EEG graphic waves properly detected, through specific sensitive appliances gathered to be transmitted to other participant's brain. It follows a detectable phase difference elaboration of those EEG graphic signals because these are compatible with human brain's electrophysiology. Here not a PC but cortex is the decoding matter. Effects are impressive and constitute cognitive communication of other's cerebral functions thoughts included resulting in comprehension of the masa copied speech analog on parallel, coinciding technically to the long spoken concept of telepathy. That goes back even to the very early origination of mental constructions' that is to thought and intangible (sensed) images making. Furthermore, this brain-to-brain transmission comprises not only cognitive but also sensory interpretations. The quality of perception and interaction from person to person coincides with reality in some fields while simultaneously and at any moment intangible sensory and cognitive images noetic forms Gestalt are realized bilaterally: Psychesthetism is the essence in perception and comprehension. Always, speech and interaction simulate open space conversation.

### Biography

Fagogenis Gerasimos has done his Post-graduation from the Athens University. He did his Doctorate in Medicine. He has done his practiced in Pediatrics from the University Clinics of: Evangelismos Hospital, Athens. In the year 1979, he got License for Medical Practice in Pediatrics.
