
The below are the respective titles of the keynote speakers:

- “Efficacy, durability and safety of ampreloxetine, a norepinephrine reuptake inhibitor, given once daily to treat neurogenic orthostatic hypotension (nOH) in subjects with primary autonomic failure”

  Horacio Kaufmann, New York University School of Medicine, USA

- “Bacteriophage: From applications in infectious diseases to targeted delivery systems for brain tumours through the blood-brain barrier”

  Amin Hajitou, Imperial College London, UK

Neuroscience 2020 is going to explore recent developments in neuroscience; recently there has been an explosion in knowledge about neurological diseases affecting newborns and children. Identification of genes associated with neurometabolic disorders has allowed earlier recognition and treatment, and has consequently reduced morbidity and mortality. Epilepsy syndromes that particularly affect infants and children have received increased attention, including the identification of genes linked to these conditions, and growing interest in therapies such as the ketogenic diet, as well as surgery for medically intractable epilepsies and contributed to the rapid expansion of knowledge in the field of neurology and brain disorders with eminent speakers.

The aim of the conference is to provide a platform to academicians and practitioners from multiple disciplines to debate and deliberate on social change that is encompassed by innovation and technology.

Conference Series LLC LTD is an open resource platform that conducts 3000+ global events including International Conferences, Workshops, Symposia, Trade Shows, Exhibitions and Science Congresses in all the major scientific disciplines, including Clinical, Medical, pharmaceutical, Engineering, Technology, Business Management and Life Sciences across America, Europe, The Middle East and Asia Pacific. It is reaching over 25 million researchers, scholars, students, professionals and corporate entities all over the globe.

Conference Series LLC LTD is going to organize “Neuroscience 2020” during October 15-16, 2020 at Capetown, South Africa with the theme “Expanding the innovative trends in the field of Neuroscience” after the successful completion of Neurology Congress 2019.
