

International Conference on Medical Case Report

Dato Amir Firdaus Abdullah

MD & Group CEO at Aurelius Healthcare & Director at PVRE Capital, Kuala Lumpur, Malaysia
E-mail: amirfirdaus@aureliushealth.com

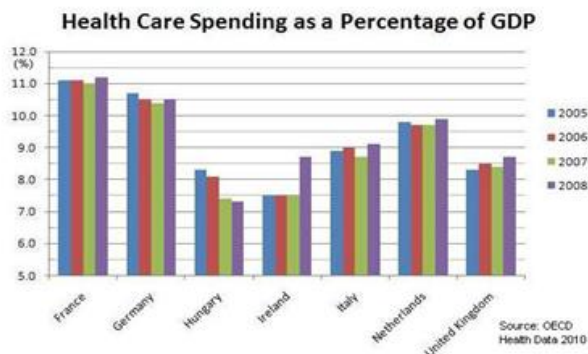

Scope and Importance:

[Case Reports](#) 2020 give a superb platform for Clinical Practitioners, medical/ health practitioners, students, professionals, researchers in drugs. Archives of [Clinical and Medical Case Reports](#) admit for any original case report that expands the world of general medical data and original analysis relating to case reports in conjunction with report of the symptoms, diagnosis, treatment and follow-up of a private patient.

The below two graphs gives you the expenditure details in health care sector.

Figure 1: Provides you with the information of health care spending as a percentage in Europe.

Figure 2: Provides you with the information of health care spending of the major countries in the world.

All clinical cases ought to be according in an exceedingly method that give proof that adequate steps are taken to reduce damage, to avoid coercion or exploitation, to safeguard confidentiality, to reduce the danger of physical and psychological harm, and to respect autonomy.

Why Paris?

The Paris health care system is one of universal health care largely financed by government national health insurance. In its 2000 assessment of world health care systems, the World Health Organization found that France provided the "close to best overall health care" in the world. The average spent by countries in Europe but less than in the US. Approximately 79% of health expenditures are covered by government funded agencies. So the International Conference on Medical Case Report, going to be held in Paris, France.

Paris, France's is a major European city and a global center for art, fashion, and culture. The entire population must pay compulsory health insurance. The insurers are non-profit agencies that annually participate in negotiations with the state regarding the overall funding of health care in Paris

In large cities, such as Paris, the physician's charge significantly more for consultations. Because they are not adhering to the fees imposed by the Assurance disease, patients are very poorly reimbursed with the mutual covering the rest of up to 100% of the official fees.

Global Business Value:

The growth of the market is attributed to the increasing adoption of digital pathology to spice up science laboratory efficiency, rising prevalence of cancer, growing applications of digital pathology in drug development and companion drugs, straight forward consultation and increasing initiatives by governments and business players. Introduction of reasonable scanners for pathology practices, personalized medication and integration of laboratory information systems (LIS) and digital pathology systems are expected to supply important growth opportunities for makers in the coming years.
