Introduction

Health Economics & Outcome Research: Open Access promotes quality research in clinical and medical sciences and invites authors to share their research to get recognized globally. We request the authors to go through the aim scope and the instructions for the authors for manuscript submission prior to initiate any submission.

The Health Economics & Outcome Research: Open Access encourage authors to submit manuscripts through editorial tracking system for easy, efficient and quick submission, review and publication process. Manuscript submission through ETS adopts a user friendly, self-explanatory and easy to navigate technology.

Use the submit manuscript link mentioned below to take you through the relevant submission page and then select 'Submit Manuscript' to go through to the submission process. Step-by-step instructions are available on the site. If you are unable to submit through the Editorial tracking site, please email the manuscript to our editorial team at submissions@iomcworld.org by mentioning the article title in the subject line.

This peer reviewed journal covers a wide range of subjects on economic policies, medical infrastructure development, development strategies on health, nutrition and medicine, primary healthcare for women and children that may have wider implication on the progress of the public health systems across the globe. The journal lays special emphasis to understand the behavior of individuals, health care providers, public and private organizations, and governments in decision-making.

The journal promotes all the major research formats for publication and hence authors are encouraged to prepare manuscript as research articles, review articles, case studies, short communication and commentaries.

Special issue articles can include both original unpublished research articles and review articles related to the specific theme.

Manuscripts will be accepted for publishing in the

Special issue only after getting approved by the peer review committee [selected by the guest editor(s)].

All the articles in special issues should strictly adhere to journal style and formatting.

Each special issue can be created with 10-15 articles.

Agenda setting; Allocating funding; Capacity building; Equity; Health policies; Health research systems; Improved health; Knowledge production and translation; Research evaluation; Research impact assessment.
